developed with a central theme and by a teaching community as part of a community that teaches with the understanding that matter is composed of particles and the structure of those particles determines the properties of matter. Dr. Tro took great lengths in the text to ensure that everything from organization art and pedagogy reinforce this theme. The result of this emphasis is that the topic order has been constructed to make key connections earlier, stronger, and more often than the traditional approach. Linking conceptual understanding with problem-solving skills throughout each chapter, numerous conceptual connections encourage comprehension of the most complex concepts. While a consistent step-by-step framework in the worked examples allows students to think logically through the problem-solving process, visualizing and understanding chemistry. Revolutionary multipart images illustrate and reinforce the theme of the text and allow students to see and experience the molecules responsible for the structures and properties of matter.

For one-semester courses in preparatory chemistry, builds 21st-century and problem-solving skills, preparing students for success now. In its 6th edition, the best-selling introductory chemistry continues to encourage student interest by showing how chemistry manifests in students' daily lives. Author Nivaldo Tro draws upon his classroom experience as an award-winning instructor to extend chemistry from the laboratory to the student's world, capturing student attention with relevant applications and an engaging writing style. The text provides a superior teaching and learning experience, enabling deep conceptual understanding, fostering the development of problem-solving skills, and encouraging interest in chemistry with concrete examples. Extending chemistry from the lab to the student's world, the text reveals that anyone can master chemistry, refined to meet its purpose of teaching relevant skills. The 6th edition includes new questions, data, and sections to help students build the 21st-century skills necessary to succeed in introductory chemistry and beyond. Already a visual text, in this edition, the art has been further refined and improved, making the visual impact sharper and more targeted to student learning. The new edition also includes new conceptual checkpoints, a widely embraced feature that emphasizes understanding rather than calculation, as well as a new category of end-of-chapter questions called data interpretation and analysis, which present real data in real-life situations and ask students to analyze and interpret that data. Also available as a Pearson eText or packaged with Mastering Chemistry, Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class, motivating them to keep reading and keep learning.
